

NOTES

Wolf River from mouth to New London surveyed, July 17 - Dec. 20, 1916;
 Earl M. Mason, Asst. Engr. in charge of field and office work.
 Wolf River from New London to Keshena Embury's River, Shiock River and
 Black Creek surveyed Dec. 4, 1929, to April 12, 1930, and Nov. 4, 1930, to April 1, 1931, by
 T. R. Lundsten, Jr., Engr. Shawano Lake, Fox Lake and River from Keshena, 10
 mile 216, except 2 1/2 miles above Keshena Falls, surveyed Aug. 1930 to May 7, 1931,
 by James E. Gamber, Jr., Engr. to Sept. 21, 1930, and Chas. C. Junkerhoff, Jr., Engr.,
 after that date. Survey above New London and preparation of map
 under supervision of A. R. Striegel, Civil Engr.
 Wolf River from Keshena Falls to south line of Langlade Co., mile 137 to 160,
 taken from maps by Mead and Seastone, Consulting Engrs., prepared for
 Wis. Power and Light Co. in 1928.
 Soundings below New London are referred to standard low water
 and those above New London are referred to the ordinary low water
 surface of the river, except as otherwise indicated. Elevations for points
 in Shawano and above are referred to mean sea level as determined
 from U.S. Coast and Geodetic Survey bench marks and elevations below
 Shawano are referred to the datum used for the 1916 survey of the Fox
 River and Wolf River below New London which of the just below
 Shawano was found to be 603 feet above the U.S. C. & G. S. Sea Level datum.
 H.W. - High water; L.W. - low water; S.L.W. - standard low water; M.W. - mean water.
